Personal Profile

Since I started my **Engineer School**, I discovered a lot of interesting domains in informatics. **Back-End development, security (web, networks and software) and game development** are my favourites: I am searching an **End Of Study internship in Europe** that could allow me to work in one or several of these fields. I love music (especially drums), travels and meeting new people. At work, I am a fast learner and I am dedicated to what I do.

Work Experience

Back-End Developer Intern - EXYZT, Castres (France)

January - March 2018

Development of a NodeJS server long polling a CouchDB database, formatting and sending the data to a distant server. Development of a functionality to an existing dispatcher to send pictures from a PDA to a distant server.

Front-End Developer Intern - Prefecture of Gard, Nîmes (France)

January 2017 - March 2017

Development of new intranet sites from scratch and update of existing ones.

Temporary - Departmental Direction of the Territories and the Sea, Nîmes (France)

Summers 2014 - 2017

Key Skills

HTML/CSS
JavaScript ES6
NodeJS
Network Security
Cryptography
Java

PHP
Linux
SQL/NoSQL DB
C++
English (960pts TOEIC)

Education

Erasmus at the Czech Technical University, Prague October 2018 - February 2019

Informatics Engineer

Courses of **advanced cryptography, web services and middleware, information security, law and informatics, network security and distributed systems and computing.**

Great Engineer School Télécom Saint-Etienne September 2016 - September 2019

Informatics and Image Engineer

Courses of web, Java and C/C++ development, Agile methods, computer science. Cryptology option.

Preparatory School - Maths and Physics 2014 - 2016
